EXPERIENCE

Lead Software Engineer, R&D

Intelie, a RigNet Company

📅 Aug 2011 – Ongoing (8 yrs 5 mos) 📍 Rio de Janeiro / Houston / London

- Key person in the product division, leading a small team of very specialized professionals;
- Responsible for the Core Platform roadmap and implementation;
- Accomplishments:
 - Pipes, an event stream processing language (pipes.intelie.com);
 - Distributed event stream query engine;
 - Extensive use of probabilistic algorithms and data structures;
 - Processing up to 3TB of streaming data, per day, per cluster;
 - JVM performance tuning and instrumentation;
 - Delivering a Platform used by teams spread across 4 countries.

Software Engineer

Living Consultoria

📅 Dec 2007 – Aug 2011 (3 yrs 8 mos) 📍 Rio de Janeiro

- Delivered projects for several customers around the globe, with great focus on billing solutions;
- Member of the architecture committee;
- Wrote the company's web framework in C#.

Software Engineering Intern

Biologica Sistemas

📅 Feb 2007 – Dec 2007 (11 mos) 📍 Rio de Janeiro

- Responsible for a Java-based webservice for batch biometric authentication, integrating with C++ code;
- Maintainer of a UI written in C# for biometric capture, that was used in large-scale public tenders in Brazil.

EDUCATION

Ph.D. in Systems Engineering and Computer Science

Federal University of Rio de Janeiro

📅 Jun 2017 – Ongoing, GPA: 4.0

Ongoing: researching graph stream algorithms

M.Sc. in Computational Sciences

State University of Rio de Janeiro

📅 Mar 2014 – Mar 2017, GPA: 3.8

Probabilistic data structures applied to implicit graph representation

B.Sc. in Informatics and Information Technology

State University of Rio de Janeiro

📅 Jan 2006 – Aug 2013, GPA: 3.0

MOST INTERESTED IN

I love algorithms & data structures, software optimization, and compilers. I enjoy bridging the gap between theoretical and applied computer science through code.

MOST PROUD OF

Miguel

My beloved son.

QConSP Program Committee

QCon is a prestigious international software conference. After many years as a regular speaker, in 2018, I was invited to be part of the Program Committee, hosting of the Computer Science track in the São Paulo edition.

🔗 qconsp.com/sp2020/track/ciencia-da-computacao-no-mundo-real

Master's Thesis Award

My master's thesis "Probabilistic data structures applied to implicit graph representation" was chosen as one of the top 9 theses of 2017 by the Brazilian Computer Society.

Competitive Programming

I really enjoy programming contests. In the IEEEExtreme, I have once won a 1st place in Brazil (2013) and 34th place worldwide (2014). In the ICPC, I was five times South-American finalist. My most popular GitHub repository is a collection of problems solved in my early training years.

🔗 github.com/juanplopes/icpc

StackOverflow reputation

I have a 9k+ reputation on StackOverflow, which is not a huge number, but this still makes me proud, given I mostly answer questions in the not-so-popular [algorithm] tag.

🔗 stackoverflow.com/users/1327235

Recent work

I have recently been fiddling with JVM introspection and heap overhead.

🔗 github.com/intelie/introspective

Using that library, I have managed to create an aggressively optimized implementation of java.util.Map:
